Spare parts and equipment – reliable, cost-effective and flexible.

Procurement of the right spare parts at the right time and in the right place is often a tedious business. Logistics, especially with global shipments, require extensive know-how and good contacts. The processing often takes time and nerves.

Let us do it for you.

Procurement and delivery of spare parts all over the world on request in full service with complete processing and logistics.

Your advantages:

Procurement and delivery of spare parts all over the world on request in full service with complete processing and logistics.

Our customers are companies in Germany, Europe and around the world: industry, shipping, construction and numerous spare parts dealers.

Our company near Hamburg offers all conditions for fast shipping by highway or airfreight. Our proximity to the largest German seaport provides optimal opportunities for shipping large quantities and large equipment.
